

30kw hybrid inverter for sale in Honduras

Overview

What is a hybrid V3 30kW inverter?

This Hybrid V3 30KW is the single largest 3-phase inverter we offer at the moment with 230V (P-N) / 400V (P-P) output and it is designed mainly for industrial application with a DC nominal base voltage of 384V.

How many watts can a 30kW solar inverter handle?

These inverters can handle a range of power sources from 30,000 watts to 39,999 watts. Compare these 30kW commercial solar inverters from ABB, Fronius, SMA, SolarEdge, SatCon, Solectria, Schneider Electric, PV Powered, Power One, or Advanced Energy. Combine them with solar panels for a complete home system to qualify for tax credit and rebates.

Can a hybrid V3 30kW be used as a generator?

Similar to all of our hybrid-line inverters (grid feed capable), the Hybrid V3 30KW can also send any excess solar power to grid. In OFF-GRID mode, generators may be used in place of utility for backup. An integrated dry contact may be used to control on/off of the generator. Only quality inverter-type generators are recommended for use.
