An uninterruptible power supply (UPS) is a type of backup battery that will continue to provide electrical power to the electronics that you have plugged into it even if electricity from your home outlets cuts out. Unlike a backup generator, it does not need to power up in order to start generating.

The CyberPower LE1000DG is the best UPS for people who want to back up a few small electronics — such as a modem, router, PC, external hard drive, or game server — during a blackout lasting up to three hours. It offers many of the same premium features found in pricier models, including battery.

No Standalone lithium batteries are sold with the product. Mini uninterruptible power supply for power outage, compatible with router, modem, security camera, telephone, fax, printer, fingerprint recorder, LED strip lights, ect, and can still use the network in case of power outage. Aluminum housing.
