

Alofi backup solar container battery

Overview

What is a solar battery backup system?

Solar battery backup guarantees a power source — even during a grid service failure or natural disaster. When the grid goes down, a solar battery backup system automatically detects and transitions your solar system from grid power to backup power. Protect your home from outages with our solar battery backup kits. [Shop What's in a kit?](#)

FAQ.

Can a solar battery backup power a home during a power outage?

Yes, solar battery backups can power homes during outages. For a backup to function, the solar panel system must be equipped with a special inverter that isolates the home from the grid during outages. This allows stored energy to be used instantly.

Why should you use battery backup systems with solar panels?

Battery backup systems provide crucial protection against power disruptions, but pairing them with solar panels creates true energy independence. This combination, known as solar-plus-storage, offers renewable resiliency that keeps your home powered even during extended grid outages.

Are solar panels paired with a home battery energy storage system?

By Sam Wigness | Dec 4, 2025 In the last year, nearly two-thirds of solar.com customers paired their solar panels with a home battery energy storage system (aka BESS). Why?
