

Angola China Sodium Energy Storage Project

Overview

The project consists of 42 BESS containers with 185 Ah sodium-ion batteries, 21 power conversion systems, and a 110 kV booster station. The project is being developed and managed by Datang Hubei Energy and marks China's efforts to diversify away from lithium to more.

The project consists of 42 BESS containers with 185 Ah sodium-ion batteries, 21 power conversion systems, and a 110 kV booster station. The project is being developed and managed by Datang Hubei Energy and marks China's efforts to diversify away from lithium to more.

China has seen another energy storage project using sodium-ion batteries go into operation, as the new batteries begin to gain wider use in energy storage. State-owned power company China Datang Corporation put a 100-MWh energy storage station using sodium-ion batteries into operation in central.

The first phase of the world's largest sodium-ion battery energy storage system (BESS), in China, has come online. The first 50MW/100MWh portion of the project in Qianjiang, Hubei province has been completed and put into operation, state-owned media outlet Yicai Global and technology provider HiNa.

Sineng Electric's 50 MW/100 MWh sodium-ion battery energy storage system (BESS) project in China's Hubei province is the first phase of a larger plan that will eventually reach 100 MW/200 MWh. The initial capacity has already been connected to the grid and can power around 12,000 households for an.

After last year's slowdown, investment in China's sodium-ion battery sector is rebounding in 2025, and one of the biggest projects yet has now entered the development pipeline. While many lithium-ion battery manufacturers in China are sold out and struggling to keep pace with demand from the energy.

An aerial drone photo taken on Aug. 21, 2024 shows a view of an energy storage station at Taiyangshan Township of Wuzhong, northwest China's Ningxia Hui Autonomous Region. (Xinhua/Yang Zhisen) NANJING, Jan. 24 (Xinhua) -- In an eastern Chinese coastal county of Rudong, a 35-story-high steel.

The company officially inaugurated the first phase of the Datang Hubei sodium ion

energy storage power plant scientific and technological innovation demonstration project, reaching a production capacity of 50 MW/100 MWh. This project opened on June 30, 2024, with battery cells supplied by Zhongke.

Angola China Sodium Energy Storage Project

[Energy storage poised to fuel China's growth-Xinhua](#)

In June last year, a 100-megawatt-hour sodium-ion energy storage project began operation, representing the first large-scale commercial use of sodium-ion energy storage ...

CATL expects sodium batteries to see widespread adoption ...

In 2026, sodium batteries will be used on a large scale in battery swap, passenger vehicles, commercial vehicles, and energy storage, CATL said. This comes amid a surge in ...

[World's largest sodium-ion project comes online in China](#)

The first phase of the world's largest sodium-ion battery energy storage system (BESS), in China, has come online.

[World's largest sodium-ion BESS starts operation](#)

The sodium ion cells used in the project were provided by Sino-Science Sodium and the project marks a new stage in the commercial operation of

sodium ion battery energy ...

['World's largest' sodium-ion battery energy storage project](#)

This is currently the world's largest sodium-ion battery energy storage project and marks a new stage in the commercial operation of sodium-ion battery energy storage systems, ...

[CATL to Deploy Sodium-Ion Batteries at Scale in 2026](#)

CATL will deploy sodium-ion batteries at scale in 2026 across swap, EV, and storage markets with Naxtra cells meeting China's new safety standard.

LiFePO ₄
Wide temp: -20°C to 55°C
Easy to expand
Floor mount&wall mount
Intelligent BMS
Cycle Life:≥6000
Warranty :10 years
