This paper provides a comprehensive overview of the current state of lithium in Chile, with a forward-looking assessment in the context of the ongoing national lithium strategy. The global and regional significance of lithium as a critical energy resource is examined.

Chile has solidified its position as a global leader in lithium production and reserves, with recent studies revealing a 28% increase in total lithium resources to 14.05 million metric tons. This revision, announced by Chile's National Mining Company (ENAMI), underscores the country's strategic.

A new report by the International Council on Clean Transportation (ICCT) and Centro Movilidad Sostenible (CMS) outlines how Chile can move beyond lithium exports to become a regional leader in electric vehicle battery production. The analysis also assesses the GHG emissions intensity, water.

On April 20, the Chilean government announced its new lithium strategy, [1] which plans to give control of the country's lithium industry to the state. While Chile's decision is fueling much debate and commentary, this article explains why Chile's lithium production is particularly important and.

The announcement by President Gabriel Boric on April 20, 2023, that private companies will need to partner with the state to extract lithium is the latest sign that the Chilean government is attempting to increasingly control Chile's mining industry.¹ Chile is currently the second largest producer.

The mining giant Rio Tinto and Enami have united their efforts to develop lithium resources strategically. The world's second-largest mining group Rio Tinto has taken an important step toward strengthening its global lithium market position by forming a key agreement with Chile's National Mining.

Companies are developing new technologies that reduce water use during lithium

extraction in Chile. These advancements could make lithium extraction more water-efficient. The National Lithium Strategy represents efforts to revitalize the country's lithium industry by integrating state oversight.
