

BESS containerized generator in Barcelona Spain

Overview

Does Spain need a Bess energy system?

Currently, Spain has 6.3GW of hydroelectric and 1GW of thermal storage capacity installed. In fact, the non-BESS storage capacity in Spain is higher than in any other European country. As a result, the need for BESS to integrate renewable energy sources into the electricity system is less immediate than in the UK, for example.

How many Bess projects are there in Spain?

In March 2025, UK companies Renewco and Atlantica announced the development of up to 2.2GW of BESS projects across Spain. Other projects in the pipeline primarily involve storage co-located with solar or wind generation. According to BloombergNEF, the total capacity currently in the BESS pipeline is around 3GW.

What is the current situation of the Spanish Bess market?

The current situation of the Spanish BESS market confirms that both of these factors are required to gain market attraction: Despite a high penetration of renewable energy, the Spanish regulatory framework has been lagging and the first BESS projects of significant size have yet to be built.

What is a Bess & how does it work?

Without batteries, the surplus would be wasted. With a BESS, that energy is stored and used at night or during low-generation periods. This balances supply and demand, relieves pressure on the grid, and increases energy efficiency. In a highly renewable and intermittent system like Spain's, this makes all the difference.

BESS containerized generator in Barcelona Spain

BW ESS, Ibersun to develop 2.2 GW of battery storage in Spain

Based in the Basque Country and founded by executives with more than 25 years' experience in the energy sector in Spain and worldwide, Ibersun has been developing ...

Spain launches EUR700 million support scheme for energy storage

It is open to standalone battery energy storage system (BESS) projects, thermal energy storage projects and pumped hydro energy storage (PHES) projects as well as those ...

[Spain launches EUR700 million support scheme for ...](#)

It is open to standalone battery energy storage system (BESS) projects, thermal energy storage projects and pumped hydro energy ...

Spanish government supports BESS development , Abdul Latif ...

All the projects are fully permitted and are seeking advanced connection dates pre-2030. FRV strengthens its commitment to the UK market,

which hosts FRV's first-ever ...
