The Kenya Electricity Generating Company PLC (KenGen) has unveiled its first-ever Battery Energy Storage System (BESS) to power its modular data centre in Nairobi. The new system marks a significant step in Kenya's transition to a low-carbon future and reinforces KenGen's commitment to reliable.

Preliminary analysis from a recent study by the Ministry of Energy indicates the critical need of integrating BESS within the national grid infrastructure. The BESS will be utilized in the storage of excess energy generated by geothermal plants and help address grid instability arising from high.

Kenya is reaching a pivotal cross-road: to be proactive or reactive?

Kenya's peak electricity demand hit 2.36GW in August 2025, with just 3GW in effective supply capacity (assuming the wind is blowing and the sun is shining!). With power outages on the rise and a freeze on new Power Purchase.

Preliminary analysis from a recent study by the Ministry of Energy indicates the critical need of integrating BESS within the national grid infrastructure. The BESS will be utilized in the storage of excess energy generated by geothermal plants and help address grid instability arising from high.

Kenya's largest electricity company, Kenya Electricity Generating Company (KenGen), has commissioned a Battery Energy Storage System (BESS) to power its modular data center at its headquarters in Nairobi. First reported by the Citizen, the system, which has a capacity of 1.16MWh, will serve.

The BESS will power KenGen's modular data centre in Nairobi. The newly launched 1.16 megawatt-hour (MWh) BESS was built to supply uninterrupted renewable power to KenGen's 52-kilowatt Modular Data Centre (MDC), which houses 356 U-spaces dedicated to supporting the company's expanding digital.

Bess battery storage in China in Kenya

Powering the future: Is Kenya Ready to Plug into Battery Energy ...

With the upcoming Eastern Africa Power Pool (EAPP) opening up regional energy trade and the 2024 Energy Regulations enabling market participation, Kenya has a further ...

[Kenya: Sites earmarked for battery energy storage project](#)

The Kenya Electricity Generating Company PLC (KenGen) is to implement a Battery Energy Storage System (BESS) project as part of a World Bank funded programme. ...

- ✓ 50KW/100KWH
- ✓ HIGHER POWER OUTPUT IN OFF-GRID MODE
- ✓ CONVENIENT OPERATION & MAINTENANCE
- ✓ PRE-WIRED

[KenGen Powers Data Centre With New Standard Grid Battery](#)

The Kenya Electricity Generating Company PLC (KenGen) has unveiled its first-ever Battery Energy Storage System (BESS) to power its modular data centre in Nairobi.

[KenGen Commissions New Battery Energy Storage System in ...](#)

KenGen has commissioned its first Battery Energy Storage System (BESS) in Nairobi to power its modular data center, ensuring uninterrupted

renewable energy supply.

KenGen Commissions New Battery Energy

...

KenGen has commissioned its first Battery Energy Storage System (BESS) in Nairobi to power its modular data center, ensuring ...

KenGen installs BESS unit at modular data center in Nairobi, Kenya

Kenya's largest electricity company, Kenya Electricity Generating Company (KenGen), has commissioned a Battery Energy Storage System (BESS) to power its modular ...
