

# Bess system for solar factory in Saudi-Arabia

## Overview

---

Saudi Arabia has connected a 500 MW/2000 MWh battery energy storage system (BESS) in Bisha, located in the southwestern province of 'Asir. The facility is currently the largest operational single-phase energy storage project in the world.

Saudi Arabia has connected a 500 MW/2000 MWh battery energy storage system (BESS) in Bisha, located in the southwestern province of 'Asir. The facility is currently the largest operational single-phase energy storage project in the world.

The partnership was revealed at the Solar & Storage Live KSA exhibition, where Hithium showcased its new energy storage solutions. The systems are equipped with advanced sandstorm protection and can endure extreme temperatures.

Updated August 29, 2025: Saudi Arabia has made major advances in its BESS projects as it launches one of Middle East's largest BESS deployments, a 4GWh BESS project. The nation's battery storage drive comes as HiTHIUM is commissioned with a 4 GWh BESS project in a joint venture between the Saudi.

This is where Battery Energy Storage Systems (BESS) come into play—a smart solution that allows energy to be stored when available and reused when needed. BESS protects production lines from interruptions, reduces costs, and supports the transition toward clean energy. In this article, we will.

A Battery Energy Storage System (BESS) is a technology that stores electricity for later use. It helps balance the power grid by storing excess energy when production is high and releasing it when demand rises. BESS is key for using renewable energy sources, like solar and wind. These sources don't.

Saudi Arabia is rapidly emerging as one of the world's largest markets for battery energy storage systems (BESS), with over 6.2 GW of upcoming capacity and a long-term target of 48 GWh by 2030. The Kingdom has already tendered more than 26 GWh of storage projects, with over 6 GW under construction.

These initiatives, part of Vision 2030, aim to diversify the economy and establish the Kingdom as a global hub for innovation and sustainability. At the heart of these projects lies a critical technology: Battery Energy Storage Systems (BESS). This

case study explores how BESS is powering Saudi.
