

# Bhutan buys home energy storage

## Overview

---

Nestled in the Himalayas, Bhutan is making waves in renewable energy adoption. With 94% of its electricity already generated from hydropower, the country now focuses on household photovoltaic energy storage systems to achieve complete energy independence.

Nestled in the Himalayas, Bhutan is making waves in renewable energy adoption. With 94% of its electricity already generated from hydropower, the country now focuses on household photovoltaic energy storage systems to achieve complete energy independence.

Bhutan's National Energy Policy 2025 (NEP 2025), released in June 2025 by the Ministry of Energy and Natural Resources (MoENR), represents a pivotal shift in the country's energy strategy. Titled "Empowering Energy Security & Sustainable Growth," the policy consolidates and supersedes several prior.

Bhutan is entering a new era of clean energy with major commitments from Adani, Reliance, and Tata to develop large-scale hydro and solar projects across the kingdom. The combined ventures — including Adani's 570 MW Wangchhu, Tata's 600 MW Kholongchhu, and Reliance's 500 MW solar farm — are set to.

Reliance Power and Bhutan's Druk Holding to jointly develop a 500 MW solar project with Rs 2,000 crore investment—the largest FDI in Bhutan's solar sector. The project aims to diversify Bhutan's renewable energy mix and boost regional clean energy collaboration under a BOO model. Reliance Power on.

With hydropower providing 80% of its electricity, Thimphu's facing a modern dilemma: how to store surplus monsoon energy for dry winters. The Thimphu Power Storage initiative, launched in 2023, aims to solve this through cutting-edge battery systems. But wait, isn't Bhutan already carbon-negative?

The solar project, to be jointly developed by India's Reliance Power and DHI, the investment arm of the Bhutanese government, will have a capital outlay of up to USD 235 million. India's Reliance Power announced it has signed a commercial term sheet for long-term power purchase agreement with Green.

Nestled in the Himalayas, Bhutan is making waves in renewable energy adoption. With 94% of its electricity already generated from hydropower, the country now focuses on household photovoltaic energy storage systems to achieve complete energy independence. This shift addresses seasonal hydropower. How will solar and wind projects help Bhutan?

The introduction of solar and wind projects helps Bhutan stabilise supply throughout the year. The 500 MW Reliance solar farm and local solar-wind installations like those in Sephu and Rubesa will cover winter shortfalls and reduce the need to import power during dry months.

What is Bhutan's energy security & sustainable growth policy?

Titled "Empowering Energy Security & Sustainable Growth," the policy consolidates and supersedes several prior frameworks, including the Bhutan Sustainable Hydropower Development Policy 2021, Alternative Renewable Energy Policy 2013, Domestic Electricity Tariff Policy 2016, and National Energy Efficiency & Conservation Policy 2019.

Is Bhutan a green energy exporter?

Market-Oriented Reforms: Establishing a domestic trading platform and regional interconnections (e.g., via Renewable Energy Certificates) positions Bhutan as a green energy exporter, potentially boosting revenues beyond the current 38% electricity share in total energy supply (793 KTOE in 2022).

## Bhutan buys home energy storage

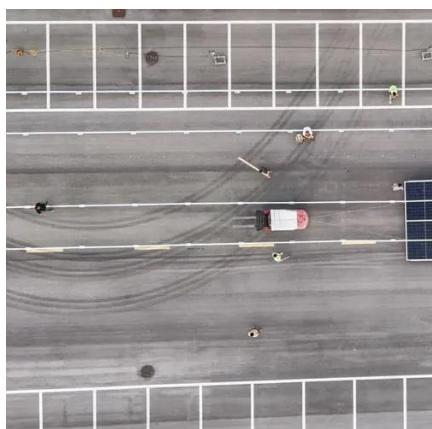

### [Bhutan's Clean Energy Boom and Future Power ...](#)

Hydropower will remain the backbone, but solar and wind will fill critical seasonal gaps and support domestic electrification. The result? ...

## **Reliance Power and DHI to Build Bhutan's Largest Solar Power ...**

The facility, set to become the largest solar plant in Asia, will have a generation capacity of 930 MW and incorporate a 465 MW/1,860 MWh battery storage system to ensure ...

### [Reliance Power-Bhutan tie-up for largest solar ...](#)

This solar project is a key part of Reliance Power's wider clean energy plan, which includes 2.5 GW of solar capacity and over 2.5 ...

## **Thimphu Power Storage: Bhutan's Answer to Renewable Energy ...**

With hydropower providing 80% of its electricity, Thimphu's facing a modern dilemma: how to store surplus monsoon energy for dry winters. The

Thimphu Power Storage initiative, launched ...

## Home energy storage bhutan

The rising popularity of self-generated renewables and home energy storage. More homeowners than ever before are embracing self-generated renewables and battery storage systems.

## Reliance Power-Bhutan tie-up for largest solar project yet

This solar project is a key part of Reliance Power's wider clean energy plan, which includes 2.5 GW of solar capacity and over 2.5 GWh of battery energy storage.

## Reliance Power to build 500 MW solar project in Bhutan

The solar project is expected to have a capital outlay of up to INR 20 billion (about USD 235 million) under the Build-Own-Operate (BOO) model, making it the largest private ...

## Bhutan Residential Energy Storage Market (2024-2030) , Trends, ...

Bhutan Residential Energy Storage Industry Life Cycle Historical Data and Forecast of Bhutan Residential Energy Storage Market Revenues & Volume By Technology for the Period 2020-2030

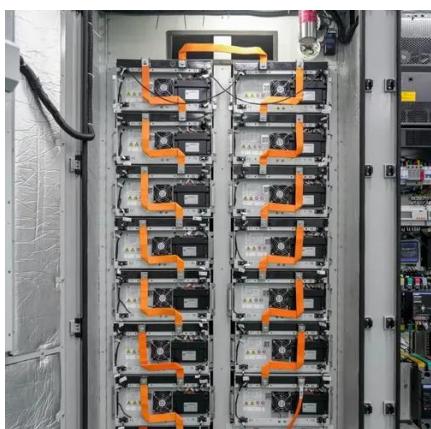

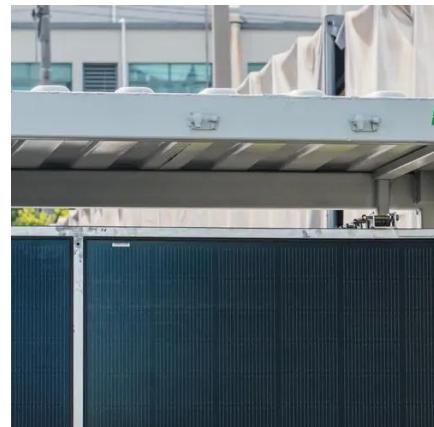

## A Comprehensive Review of Bhutan's National Energy Policy ...

Multi-purpose reservoirs and pumped storage with solar hybrids are prioritized for firm power. Solar and other renewables (wind, geothermal, biomass) are promoted via PPPs, ...

## Bhutan Household Photovoltaic Energy Storage Powering ...

Nestled in the Himalayas, Bhutan is making waves in renewable energy adoption. With 94% of its electricity already generated from hydropower, the country now focuses on household ...

## Bhutan's Clean Energy Boom and Future Power Outlook

Hydropower will remain the backbone, but solar and wind will fill critical seasonal gaps and support domestic electrification. The result? A more resilient, self-sufficient energy ...

## **Reliance Power, Druk Holding to jointly develop 500 MW solar ...**

Reliance Power's total clean energy pipeline currently stands at 2.5 GWp solar and over 2.5 GWhr of BESS (Battery Energy Storage Systems) capacity. This project is poised ...

## [Reliance Power, Druk Holding to jointly develop ...](#)

Reliance Power's total clean energy pipeline currently stands at 2.5 GWp solar and over 2.5 GWhr of BESS (Battery Energy Storage ...
