SIL-530-XM is part of the NTC Series — one of the most recent made by Silfab. These panels employ cutting-edge technologies to achieve superior efficiency and reliability. The Passivated Emitter Rear Contact (PERC) technology ensures excellent power output. This solar cell type employs an.

530W panels deliver optimal power density: With efficiency ratings of 20-22%, these panels generate nearly double the power of traditional 300W modules while fitting standard residential roof layouts, making them ideal for space-constrained installations in 2025. Advanced half-cell technology.

The Silfab SIL-530 XM Bifacial Solar Module is a robust solution for commercial solar installations, incorporating N-type cell technology and bifacial design. Manufactured in the USA, this 520W module offers strong performance for businesses seeking to optimize their solar energy systems. Its.
