### What is a Bess system?

A BESS is a complex device with intricate technical components. These include battery cells, typically lithium-ion, and inverters that transform direct current (DC) to alternating current (AC). There are multiple control systems, including battery management, power conversion, fire safety, and more. These systems come in a range of sizes.

### Can You enclose a Bess in a garage?

You might have a small BESS mounted in your garage to charge your electric vehicle. A residential BESS that powers your home in an outage might be the size of a mini fridge. But larger applications, like a solar farm, require much larger systems. And the bigger the BESS, the bigger the challenge to enclose it.
