NEW YORK-- (BUSINESS WIRE)-- A wholly owned subsidiary of Glenfarne Asset Company, LLC (“Glenfarne”), a developer, owner-operator, and industrial manager of energy and infrastructure assets, today announced it has entered into an agreement to acquire four assets in Chile with a combined 909.

Natura Energy SpA specializes in renewable energy solutions, particularly in the development of energy storage systems. They offer a 200kWh lithium battery energy storage system (BESS) that can integrate with photovoltaic solar systems, enhancing energy independence for their clients. Sistema de.

In February of 2025, Chile experienced an unprecedented nationwide power outage allegedly caused by a third-party disregard for established protocol regarding a malfunctioning communication module, showing a potential vulnerability of Chile's electrical system. The energy matrix diversification.

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers. Since Chilean co-located storage assets don't require an Environmental Impact.

INTRODUCTION TO ENERGY STORAGE IN CHILE The Chilean energy landscape has been undergoing a significant transition, primarily due to a substantial shift towards renewable energy sources. With an abundance of solar and wind potential, Chile has emerged as a leader in Latin America for renewable.

Zelestra will develop a 220 MWp of solar Photovoltaic and 1 GWh of energy storage

capacity in Chile. Solar and storage projects are crucial in Chile's decarbonization goals for enhanced security, grid stability, and efficient distribution. Several technological innovation can help develop solar and.
