The 48VDC 380VAC 3 phase inverter category encompasses a range of power conversion devices designed to transform direct current (DC) from a 48-volt source into three-phase alternating current (AC) at 380 volts.

Xindun Power three phase inverter pure sine wave output, 100% imbalance load design, AC charging batteries function, dc 48v convert to ac 380v or ac 380v to ac 220v. pure sine wave inverter HDSX Pure sine wave output. Built-in PWM or MPPT charge controller. Low DC voltage, saving system cost. AC.

Supports 200, 208, 220, 230, 240Vac phase voltages, providing stable, clean electricity for high-demand devices and preventing equipment damage or operational interruptions. Dual MPPT efficiently manages each 9000W input with total 260A charging, optimizing mismatched or complex arrays for maximum.

The 48VDC 380VAC 3 phase inverter category encompasses a range of power conversion devices designed to transform direct current (DC) from a 48-volt source into three-phase alternating current (AC) at 380 volts. These inverters are integral in various industrial, commercial, and renewable energy.

Input Voltage: 48/96/192VDC | Output Voltage: 380/400VAC $\pm$ 2% | Efficiency:  $\geq$ 85% | Type: Off grid three phase solar Inverter pure sine wave 1 : Off grid three phase inverter pure sine wave, can be used as ups power supply. 2 : Three phase hybrid solar inverter built-in mppt controller optional. 3 :.

3 phase inverters are mainly used in uninterruptible power supply systems in the military, communications, industry and enterprises. The AC 380V 3 phase power converted by the 48v 3 phase inverter is composed of three AC electric potentials with the same frequency, the same amplitude, and the phase.

This model PH3000 Three-phase is a flexible and intelligent energy storage inverter which utilizes solar power, utility power, and battery power source to supply continuous power. This is a multi-functional hybrid inverter which can power all

kinds of appliances in home or office environment.
