

# Factory price single breaker in America

## Overview

---

A basic replacement with a standard 1-pole or 2-pole breaker often costs between \$10 and \$60 for the part, plus installation labor that ranges from \$75 to \$200. More advanced options, such as AFCI or GFCI investments, add protection features and usually elevate the total to.

A basic replacement with a standard 1-pole or 2-pole breaker often costs between \$10 and \$60 for the part, plus installation labor that ranges from \$75 to \$200. More advanced options, such as AFCI or GFCI investments, add protection features and usually elevate the total to.

Buyers typically pay for the breaker itself plus labor for replacement or installation. Main factors include breaker type (standard, AFCI/GFCI, tandem), amperage, panel compatibility, and whether a licensed electrician is required. The price range below reflects typical U.S. market costs and common.

Buyers typically pay for a panel-compatible electrical breaker based on amperage, type (general-purpose, GFCI, AFCI), and installation complexity. The main cost drivers are unit price, panel compatibility, labor time, and any required electrical upgrades. Assumptions: residential, standard 120/240V.

What is the average cost to replace a circuit breaker?

The average cost to replace a single circuit breaker typically ranges from \$100 to \$300, with the breaker itself costing between \$10 and \$50 and labor making up the majority of the expense. When your home's electrical system encounters issues.

Replacing a circuit breaker typically costs between \$150 and \$400, with the average falling around \$250. This price includes both the cost of the new breaker and the labor of a qualified electrician. The final circuit breaker replacement cost can vary based on your location, the type of breaker.

Home electrical upgrades commonly run into two main cost drivers: the breaker type and the labor required to install it safely. This guide breaks down typical costs and provides practical price ranges for common scenarios in the United States. Costs cover new standard breakers, panel capacity.

In January 2026 the estimated cost to Install a Circuit Breaker starts at \$319 - \$382 per breaker. Use our Cost Calculator for cost estimate examples customized to the location, size and options of your project. To estimate costs for your project: 1.
