The new location features eight ultra-fast charging points as well as a 300 m² retail space offering a range of services for customers. TotalEnergies has officially opened its first 100% electric service station in Paris, located within the “17&CO” urban development project in the Porte de.

In December, TotalEnergies opened the first electric-only service station in Paris, just off the périphérique, the French capital's ring road. It's an example of how major oil companies are pivoting towards EV charging, as falling demand for combustion fuels is shrinking the number of “petrol”.

The first service (or ‘petrol’) station dedicated entirely to electric vehicles was opened in Paris by TotalEnergies on December 11. The station will allow drivers to quickly charge their cars thanks to eight charging points and is located just off the périphérique, at 29 avenue de la Porte de.

This is not a revolution, but a significant step forward with this 100% electric Parisian gas station inaugurated by TotalEnergies. TotalEnergies has taken a major step by opening the first 100% electric gas station in Paris, as part of the innovative urban project “17&CO” at Porte de Saint-Ouen.

Als vervolg op de locatie in het Belgische Gentbrugge, krijgt nu het Franse St Yvi de allereerste volledig elektrische verzorgingsplaats van Fastned. Foto: Fastned, 2025 Dutch fast-charging company Fastned has won the tender to build and operate France's very first all-electric service station.

Paris Unveils Its First Electric Vehicle-Only Service Station, signaling a trend that is likely to spread not only in suburban areas but also in the heart of major cities in the coming years. Quietly, and at extraordinary scale, MacKenzie Scott has

reframed what modern philanthropy can look like.
