

# Gambia s new solar panels

## Overview

---

Jambur Solar Power Station, is a component of the "Gambia Electricity Restoration and Modernization Project" (GERMP), a US\$165 million infrastructure project financed by the (EIB), the (EU) and the (WB). The GERMP comprises the erection of the 23 MW JSPS, the construction and connection of an 8MWh (BESS), the improvement of transmission and distribution electricity netw.

The Gambia has inaugurated a 23 MW solar power facility in Jambur on its western coast. The project, which began construction in February, incorporates 8 MWh of battery storage and is expected to boost the country's energy output by 20%, powering approximately 18,500 households .

The Gambia has inaugurated a 23 MW solar power facility in Jambur on its western coast. The project, which began construction in February, incorporates 8 MWh of battery storage and is expected to boost the country's energy output by 20%, powering approximately 18,500 households .

The Gambia has officially opened a 23 MW solar power facility with 8 MWh of battery storage. This project is part of the Gambia Power Restoration and Modernization Project (GERMP), which aims to provide universal access to power by 2025. The Gambia has inaugurated a 23 MW solar power facility in.

The Jambur Solar Power Station (JSPS), is an operational 23 MW (31,000 hp) solar power plant in Gambia. The power station began commercial operations in March 2024. It is owned and was developed by the government of Gambia, with funding from the European Union, the European Investment Bank and the.

The Gambia entered a new era of energy development in April 2023 with the inauguration of its first large-scale solar energy facility in Jambur. Built by Chinese manufacturer Tebian Electric Apparatus, the 23 MW solar plant - equipped with an 8 MW electricity storage system - serves to reduce the.
