

Germany s first 5g base station

Overview

Does Germany have a 5G network?

The German Federal Network Agency allocated frequencies in the 3.7 to 3.8 GHz and 26 GHz bands for local 5G purposes, with more than 140 companies now able to operate their own local networks. There is no obligation for nationwide spectrum holders to enter into a national roaming agreement with local 5G network operators.

Where is the first 5G base station made?

Back in July of last year, Verizon received the first U.S. manufactured 5G base station from a facility in Texas. Pictured is Verizon's CTO Kyle Malady holding some of the hardware. Image used courtesy of Ericsson.

How many 5G base stations are there in the world?

In addition, a total of 819,000 5G base stations have been built by these three telecom giants, accounting for 70% of the world's total. As China has played a leading role in 5G technology, its 5G development has extraordinary significance for other countries.

Which 5G band is used primarily in Germany?

The currently most important 5G band in Germany is n78 (at 3.6 GHz). It is primarily used to supply the cities.
