

Hanoi generator container

Overview

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

What is included in a container generator?

The container generators are fully operational supplied, including air-intake, exhaust system and silenced muffler, tank, control panel and accessories such as lighting and fire extinguishers. Apart from the preparations for the load connection no further construction work at site is necessary.

What size container do I need for my Generator?

Depending on the asked performance and execution, the generators are mounted in soundproof, weatherproof ISO container with a length of 10', 20' or 40'. If desired, particularly compact container units can be delivered depending on the required power, also in intermediate sizes for 12', 25' or 30' foot container versions.

How many generators can be used in a container genset?

The container gensets can be powered by engines of following manufacturers: The container built-in control panels are based on the intended use, e.g. manual/stand alone operation, emergency/standby or parallel operation. In parallel mode (GenSet-GenSet), up to 32 generators can be used as 'Power-Plant'.
