

How is Slovenia's 5G base station

Overview

What is the European 5G Observatory?

The European 5G Observatory tracks progress in 5G infrastructure deployment across the EU and other regions worldwide according to base stations deployment, edge nodes and infrastructure sharing agreements. Source: IDATE estimates and regulators' data. Reporting period: at December 2024. Source: IDATE estimates and regulators' data.

Is 5G available for industrial purposes?

Yes. Certain operators started to introduce special 5G services aimed at the most active users. 3. Has 5G been launched for industrial purposes?

For which sectors?

The authorities have granted a 700MHz licence to support business-critical machine-to-machine (M2M), so projects such as smart factories are now in the testing phase. 4.

When did 5G start?

Operators introduced 5G services at the end of 2020 and beginning of 2021. 5G household coverage is 36.6%, and 2.8% in rural areas. 2. Are telecoms companies monetising 5G investments - or are the services provided to consumers at similar prices to 4G?

Yes. Certain operators started to introduce special 5G services aimed at the most active users.

What percentage of households use 5G?

5G household coverage is 36.6%, and 2.8% in rural areas. 2. Are telecoms companies monetising 5G investments - or are the services provided to consumers at similar prices to 4G?

Yes. Certain operators started to introduce special 5G services aimed at the most

active users. 3. Has 5G been launched for industrial purposes?

For which sectors?
