Did you know that you can connect shipping containers to create a large and

versatile space?

Any organization requiring more space than what a single shipping container has to offer, but still interested in the benefits of durable, modular, and reusable units, will benefit from combining shipping. Can a shipping container be modified?

There are many modifications and alterations we can make to shipping containers. Each seacan project needs to be quoted individually. Modification prices will vary according to material cost fluctuations, logistics and other factors. This is meant as a guide if you are considering altering or modifying a shipping container.

How much does a shipping container cover cost?

Typically, the cost of a steel shipping container cover building starts at \$11 per sqft, depending on the endwalls and other accessories chosen, with sizes that typically range between 20' and 50' wide. All steel container covers use steel gauges that range between 22 gauge and 14 gauge, depending on the structural needs of the roof.

Should a company combine shipping containers?

Of course, if a company need to relocate the container structure later, they can separate the containers and ship them individually – often on two separate trucks – which makes transportation easy. Combining shipping containers helps many companies create the ideal structure they desire.

How to connect two shipping containers?

The first step in connecting two shipping containers is to choose the right containers. Make sure you select containers that are in good condition and are the same size. It's also important to check if the containers have any damage or rust that could affect the structural integrity. Before connecting the containers, you'll need to prepare them.
