Investing in solar energy systems can lead to substantial cost savings in the long run. With decreasing prices for solar panels and incentives from the government, the initial investment is becoming increasingly affordable. Additionally, solar energy reduces electricity bills and provides a hedge.

Solar panel prices in the Philippines vary based on property type and other factors. For commercial properties, prices typically range from ₱20,000 to ₱30,000 per kilowatt, while residential installations usually cost between ₱30,000 and ₱50,000 per kilowatt. The cost of individual panels depends.

The cost of a solar system really depends on how much electricity your home or business uses each month. If your electricity bill is around ₱5,000 or less, a small solar setup might be just right for you. This usually means about six solar panels, and you'll need around 20 square meters of roof.
