

# Huawei's large energy storage plant in Canada

## Overview

---

TORONTO, May 07, 2025 (GLOBE NEWSWIRE) -- The Oneida Energy Storage Project ("Oneida") has officially entered commercial operations, becoming the largest battery energy storage facility in operations in Canada, and one of the largest globally.

TORONTO, May 07, 2025 (GLOBE NEWSWIRE) -- The Oneida Energy Storage Project ("Oneida") has officially entered commercial operations, becoming the largest battery energy storage facility in operations in Canada, and one of the largest globally.

The installed capacity of energy storage larger than 1 MW—and connected to the grid—in Canada may increase from 552 MW at the end of 2024 to 1,149 MW in 2030, based solely on 12 projects currently under construction 1. There are an additional 27 projects with regulatory approval proposed to come.

The energy storage market in Canada is poised for exponential growth. Increasing electricity demand to charge electric vehicles, industrial electrification, and the production of hydrogen are just some of the factors that will drive this growth. With the country's target to reach zero-net emissions.

The Oneida Energy Storage Project is located on 10 acres of land in Haldimand County, Ont. The site consists of 278 lithium-ion batteries with a capacity of 250 MW of electricity to help support Ontario's power grid. Supplied/Northland Power Log in or create a free account to listen to this.

The Oneida Energy Storage Project has officially commenced commercial operations. The project was completed ahead of schedule and under budget and is the largest battery energy storage facility in operation in Canada. "Today marks a major milestone for Northland and the Oneida project," said.

TORONTO, May 07, 2025 (GLOBE NEWSWIRE) -- The Oneida Energy Storage Project ("Oneida") has officially entered commercial operations, becoming the largest battery energy storage facility in operations in Canada, and one of the largest globally. Located in Haldimand County, Ontario, the 250 MW /.

Oneida Energy Storage facility is a 250 MW/1,000 MWh lithium-ion battery energy

storage facility, representing the largest grid-scale battery energy storage facility in Canada and within the top five clean energy storage projects in the world. It delivers critical capacity and improved efficiency.
