

Installation of solar panels in Podgorica

Overview

To maximize energy production from PV panels in Podgorica it's recommended that they are tilted at an angle of approximately 35 degrees facing south for fixed panel installations; this orientation optimizes exposure towards incoming light rays throughout the year.

To maximize energy production from PV panels in Podgorica it's recommended that they are tilted at an angle of approximately 35 degrees facing south for fixed panel installations; this orientation optimizes exposure towards incoming light rays throughout the year.

The solar power plant on the roof of the Parliament of Montenegro in Podgorica has started producing electricity. The plant's total peak capacity is 81 kW, and it is expected to generate approximately 100,000 kWh per year. Montenegro is likely the first country in the former Yugoslavia to install.

Located at latitude 42.4411 and longitude 19.2632, Podgorica, Montenegro is a favorable location for solar photovoltaic (PV) installations due to its substantial sunlight exposure throughout the year. During the Summer season, each kilowatt of installed solar capacity can yield an average of 7.13.

Podgorica is the administrative, economic, political, trade and academic center of Montenegro with modern road, railway and air infrastructure which is a prerequisite for a well-designed business zone and selecting its locations. MOST RECENT INVESTMENT ACTIVITY 60 mil EUR 150 mil EUR 47 mil EUR 24.

Optimize your solar installation with PVGIS, the leading photovoltaic calculator! Do you want to estimate the solar electricity production of your solar panels before investing in a photovoltaic system?

PVGIS provides you with a detailed and precise simulation of your solar yield, regardless of.
