provide 15 kW ⚡ / 18 kVA ⚡ output power. ⚡ Operation in 3-phase ⚡⚡ or ⚡⚡ split phase configuration is also possible. If ⚡ an automatic transfer switch is required we recommend using the MultiPlus inverter/charger instead. The switch is ⚡ included in these products and the charger function of the.

The ODS-3000 is a single-phase sinewave 120Vac or 230Vac DC/AC inverter series that delivers up to 4000VA. Input and output signals are galvanic isolated and the output voltage can be adjusted via RS232 along with other parameters that can be monitored and controlled through an application.

System Voltage Optimization: While 12V systems are common for RVs, 24V and 48V configurations significantly reduce DC current requirements for 3000W applications - from 250+ amps at 12V down to just 65 amps at 48V, enabling smaller wire sizes and reduced installation costs. Pure Sine Wave is.

The Quattro by Victron, much like the MultiPlus, combines the technologies of an inverter and charger. Additionally, it can accept two AC inputs and automatically connect to the active source. It shares many traits with the Multiplus, such as acting as a true sine wave inverter, adaptive charging.
