

# Investment in a 15kW Off-Grid Solar Container for a Shopping Mall

## Overview

---

Why is a 15kW solar system more expensive than an off-grid system?

A 15kw solar system with battery backup, off-grid or hybrid, is significantly more expensive, primarily because of the batteries. However, sometimes a hybrid system pays for itself quicker because energy storage helps to avoid peak energy rates from the utility.

Can a 15kW solar system go off-grid?

If you are planning to go completely off-grid with your 15kW solar system, you will need to consider additional factors. For an off-grid system, you will need to purchase 50 or more solar panels to meet the energy demands. Furthermore, you will require 95 kWh worth of lithium polymer batteries to support a full cycle.

How much does an off-grid solar system cost?

For an off-grid system, you will need to purchase 50 or more solar panels to meet the energy demands. Furthermore, you will require 95 kWh worth of lithium polymer batteries to support a full cycle. The typical cost of batteries required to run a 15kW off-grid system amounts to approximately \$44,415.

Where can I buy a 15kW solar system?

At A1 SolarStore we offer complete 15kw solar systems for sale where all the parts are already picked by our engineers. The majority of commercial-scope systems are grid-tie which means that you retain the connection to the grid when you add solar. Your appliances use solar energy all the time so that your bills decrease significantly.
