

Is there any subsidy for the Montenegro energy storage power station

Overview

October 13-14, 2025 at the Palace of Congresses in Tirana, the European Commission (Directorate-General for Neighbourhood and Enlargement Negotiations – DG ENEST), the Montenegrin Investment Agency (MIA), and CWP Europe signed a Joint Declaration of Support for the development of the.

October 13-14, 2025 at the Palace of Congresses in Tirana, the European Commission (Directorate-General for Neighbourhood and Enlargement Negotiations – DG ENEST), the Montenegrin Investment Agency (MIA), and CWP Europe signed a Joint Declaration of Support for the development of the.

Based on a detailed inventory of energy subsidies and support measures in the region, this report explores effective pathways for a green energy transition, integrating the economic and social perspectives. Between 2018 and 2023, the economies of the region provided EUR 5.8 billion in transfers and.

EPCG, a utility and distribution network operator (DNO) in the Southeast European country of Montenegro, is looking to add 300MW of BESS to its grid. EPCG, the Electric Power Company of Montenegro, will launch a public tender for the procurement of 300MWh of battery energy storage system (BESS).

The utility is procuring two grid-scale battery storage systems to the tune of EUR 48 million (\$55.9 million). EPCG, Montenegro's largest electricity provider, is investing in two four-hour battery energy storage systems (BESS) to strengthen grid resilience and balance supply and demand. Each.

Montenegro's state-owned electric utility, Elektroprivreda Crne Gore (EPCG), announced plans to launch a call for tenders to procure 300 MWh of battery energy storage systems (BESS), as part of its ongoing efforts to enhance energy infrastructure. The tendering process is scheduled to begin in.

Battery energy storage systems (BESS) are emerging as a vital solution to bolster grid stability and support the seamless incorporation of renewables. By storing excess energy during periods of high production and releasing it during demand peaks, these systems mitigate the risks of blackouts and.

Montenegro's state-owned power utility Elektroprivreda Crne Gore (EPCG) has

invited bids for the design, supply, installation and commissioning of two battery energy storage system (BESS) facilities of 30 MW each, with a capacity of 120 MWh apiece. The procurement, valued at EUR 48 million (USD).
