

Kenya Energy Storage Power

Overview

Nairobi, Tuesday, July 29, 2025: The Kenya Electricity Generating Company PLC (KenGen), has commissioned a new Battery Energy Storage System (BESS) to supply uninterrupted renewable power to its modular data center, marking a new frontier in Kenya's long-term green energy.

Nairobi, Tuesday, July 29, 2025: The Kenya Electricity Generating Company PLC (KenGen), has commissioned a new Battery Energy Storage System (BESS) to supply uninterrupted renewable power to its modular data center, marking a new frontier in Kenya's long-term green energy.

Nairobi, Tuesday, July 29, 2025: The Kenya Electricity Generating Company PLC (KenGen), has commissioned a new Battery Energy Storage System (BESS) to supply uninterrupted renewable power to its modular data center, marking a new frontier in Kenya's long-term green energy strategy. The newly.

KenGen's recent launch of a 1.16 megawatt-hour (MWh) Battery Energy Storage System (BESS) in Nairobi came with all the typical trimmings of a milestone event. The system, installed to power a modular data centre located at KenGen's headquarters, is meant to showcase how battery technology can play.

The Kenya Electricity Generating Company PLC (KenGen), has been designated to be the Implementing Agency for the Kenyan Battery Energy Storage System (BESS), which is part of the Kenya Green and Resilient Expansion of Energy (GREEN) program, funded by the World Bank. KenGen is the leading electric.

Kenya is no stranger to innovation in energy. With the geothermal-rich Rift Valley, world-class wind corridors in Marsabit and a solar belt that stretches across vast regions, the nation has made bold strides in renewable energy. The sector is now asking, will BESS be part of the solution?
