

Mobile communication tower power box

Overview

What is a portable cell tower?

Tower Solutions' portable cell towers, otherwise known as cell on wheels (COWs), are mobile towers that host a variety of transceivers and other utilities to provide cellular, broadband, or line-of-sight communications. These towers can be implemented any place a strong cell phone and broadband connection signal is required.

Why do you need a portable cell tower?

An important part of any job is staying in touch, but communication is particularly important when you are operating during a crisis or when lives are at stake. Portable cell towers from Tower Solutions help ensure a strong communication network, even in remote locations.

Do cell towers have backup power?

The backup power for cell towers is vital for daily communication and becomes a lifeline during storms or emergencies. It helps people connect with loved ones and enable emergency responders to share important information. It's worth noting that cell towers definitely have backup power for reinforcing reliable connections in critical situations.

What is a cell tower cabinet?

Cabling, such as coaxial and fiber lines, transmits signals between the antenna and the base station (or vice versa) on a cell tower. Cabinets and shelters are the buildings at the base of cell phone towers that house communication, radio, and network equipment.
