

New Energy Storage in New York USA

Overview

Governor Kathy Hochul today announced the launch of New York's first Bulk Energy Storage Request for Proposals (RFP), intended to procure one gigawatt (GW) of bulk energy storage as part of New York's 6 GW Energy Storage Roadmap.

Governor Kathy Hochul today announced the launch of New York's first Bulk Energy Storage Request for Proposals (RFP), intended to procure one gigawatt (GW) of bulk energy storage as part of New York's 6 GW Energy Storage Roadmap.

Energy storage is a smart and reliable technology that helps modernize New York's electric grid, helping to make the grid more flexible, efficient, and resilient. With thousands of energy storage sites already in place across the State, this exciting technology is playing an important role in.

A US solar industry group has outlined a nine-point policy agenda calling on New York City's incoming mayor to accelerate rooftop solar and battery deployment to address grid reliability risks, energy costs and climate targets. The New York Solar Energy Industries Association has recommended nine.

Governor Kathy Hochul today announced the launch of New York's first Bulk Energy Storage Request for Proposals (RFP), intended to procure one gigawatt (GW) of bulk energy storage as part of New York's 6 GW Energy Storage Roadmap. Adding bulk energy storage to New York's grid will lower costs. What is energy storage in New York?

Affordable and dependable energy for all New Yorkers. Energy storage is a smart and reliable technology that helps modernize New York's electric grid, helping to make the grid more flexible, efficient, and resilient.

Will New York double its energy storage goal in 2022?

Hochul announced plans in January 2022 to double New York's previous energy storage goal of 3 GW by 2030. The state released a draft road map in December 2022 showing how it would achieve its new target, including a centralized procurement mechanism to expedite solicitations and deployments.

Will New York deploy 6 GW of energy storage by 2030?

New York will deploy 6 GW of energy storage by 2030 under a framework approved Thursday by the New York Public Service Commission, the office of Gov. Kathy Hochul, D, said in a press announcement.

What is New York's New storage road map?

New York's road map aims for 3 GW of new bulk, or utility-scale, storage to be procured under the state's new competitive Index Storage Credit mechanism and 1.5 GW of new retail storage, both for assets with discharge durations up to four hours, the announcement said. Retail storage includes commercial, industrial and community-scale installations.
