

# Off-grid solar-powered container DC power supply for Vietnamese oil platforms

## Overview

---

The Intech Energy Container is a fully autonomous power system developed by Intech to provide electricity in off-grid locations. Each container is equipped with a photovoltaic array, a battery bank, and a generator — all custom-sized to meet the specific needs of the customer.

In response, MEOX Off-Grid Container Power Systems has emerged as a modular, rapidly deployable solution (4-hour setup) that integrates solar, storage, and diesel backup for reliable energy independence. Our hybrid systems leverage core technologies like DC-coupled architecture (system efficiency).

An Off Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres. Off-Grid Installer have the answer with a containerized solar system from 3 kw up wards. Systems are fitted in new.

Solar energy containers encapsulate cutting-edge technology designed to capture and convert sunlight into usable electricity, particularly in remote or off-grid locations. Comprising solar panels, batteries, inverters, and monitoring systems, these containers offer a self-sustaining power solution.

This Use Case shows an example of how a remote village in Vietnam can cut energy costs by 48%, whilst at the same time generating over 56% of their energy from renewables. To demonstrate the potential for savings with microgrids, we have calculated an example business case for a village in Vietnam.

RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank,

panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design.
