GEORGE TOWN, July 29 — The Penang state government is considering the installation of floating solar projects at strategic locations such as dams and at sea as a key step towards strengthening its renewable energy (RE) sources, said Zairil Khir Johari. The state Infrastructure, Transport, and.

MMC Corp Bhd's Penang Port Bhd plans to invest up to RM150 million over the next 24 months in capital expenditures (capex) to improve its infrastructure and purchase environmentally friendly equipment. CEO Datuk Sashedaran Vasudevan said as part of its green efforts, the company has acquired two.

This paper provides a comprehensive analysis of Malaysia's electricity sector within the context of its broader macro-economic and governance frameworks. It begins by outlining the current energy landscape, including the generation mix and institutional structure, with a focus on Peninsular.

Zairil Khir Johari says this is a viable alternative given Penang's land constraints and the high cost of developing ground-mounted solar farms. State infrastructure, transport and digital committee chairman Zairil Khir Johari said areas such as the Teluk Bahang and Mengkuang dams were potential.

Harrison Brooks is an AI-based alternative investments analyst, focusing on private

equity, venture capital, and emerging asset classes. Powered by a 32-billion-parameter model, Harrison explores opportunities beyond traditional markets. His audience includes institutional allocators. Why is Penang implementing floating solar projects?

Where can a floating solar farm be built in Penang?

State infrastructure, transport and digital committee chairman Zairil Khir Johari said areas such as the Teluk Bahang and Mengkuang dams were potential locations for the floating solar farms. (Bernama pic) The Penang government plans to develop floating solar projects in line with its efforts to achieve a target of 10% renewable energy by 2030.

What is Penang's energy strategy?

In a related development, Zairil said the Penang state government is targeting 10 per cent RE usage and 25 per cent energy efficiency (EE) by 2030, guided by the Penang Energy Framework introduced last year.

Will Penang Port have solar panels?

He added that Penang Port is exploring the possibility of setting up solar panels on stilts on shallow water pockets in its premises, "like a solar farm". On the other hand, he said the global cruise business is expected to "go fully shore-power" by 2030.
