

Poland foreign trade new energy storage box

Overview

The European Commission (EC) has greenlit Poland's USD 1.2bn scheme for projects to increase electricity storage capabilities to foster the transition to a net-zero economy under the Temporary Crisis and Transition Framework (TCTF).

The European Commission (EC) has greenlit Poland's USD 1.2bn scheme for projects to increase electricity storage capabilities to foster the transition to a net-zero economy under the Temporary Crisis and Transition Framework (TCTF).

Poland has just rolled out one of Europe's most ambitious energy storage programmes - a €980 million initiative that's set to transform the country's grid infrastructure. The Polish Ministry of Climate and Environment has finalised this landmark subsidy scheme, targeting over 5 GWh of new storage.

Poland's power sector is transitioning away from coal, with the share of coal-fired power generation in the country expected to fall from 90% in 2010 to 55% in 2025 and further down to 20% by 2030, according to the S&P Global Energy Planning Case released in January. Integrating renewable energy.

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately €1 billion). The program is co-financed by the European Union's Modernization Fund and the Recovery and Resilience.

Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects. The Polish Economic Institute reported that in the power market's main auction, which was held in December 2024, storage capacity of around 2.5 GW was contracted.

The call for applications for the Electricity Storage and Related Infrastructure Programme, aimed at enhancing the stability of the Polish power grid, will remain open until May 30, 2025. From ESS News The Polish National Fund for Environmental Protection and Water Management (NFOŚiGW) opened on.

Poland's programme to promote energy storage will result in the construction of 172 large facilities with a total capacity of 3.9 GW/14.5 GWh by 2028, the environment ministry said in a press release. Image by: Veselina Petrova. The

funding call for "Electricity storage and related infrastructure. What is Poland's energy storage subsidy?

Learn about Poland's €1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.

What is Poland doing about energy storage?

Poland has just rolled out one of Europe's most ambitious energy storage programmes - a €980 million initiative that's set to transform the country's grid infrastructure. The Polish Ministry of Climate and Environment has finalised this landmark subsidy scheme, targeting over 5 GWh of new storage capacity by 2028.

What is Poland's new energy storage scheme?

The scheme has been brewing since 2024, with the final regulation published in the Journal of Laws of the Republic of Poland in March this year. It received European Commission approval, which authorised state aid of €1.2 billion in state aid to support at least 5.4 GWh of new electricity storage facilities.

How much money does Poland spend on battery energy storage?

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately €1 billion).
