

# **Qatar's environmental project uses ultra-high efficiency photovoltaic folding containers**

## Overview

---

The Al Kharsaah solar power plant covers 1,000 hectares (the equivalent of approximately 1,400 soccer fields) and features two million bifacial solar modules mounted on trackers for achieving substantial power gains.

The Al Kharsaah solar power plant covers 1,000 hectares (the equivalent of approximately 1,400 soccer fields) and features two million bifacial solar modules mounted on trackers for achieving substantial power gains.

Doha, April 27 (QNA) - The State of Qatar is undergoing a significant transformation in its energy sector since 2022, with the launch of Ras Laffan and Mesaieed solar power plants on Monday. This move is set to position renewable energy as a core pillar in the country's national energy mix.

Doha: The State of Qatar is undergoing a significant transformation in its energy sector since 2022, with the launch of Ras Laffan and Mesaieed solar power plants on Monday. This move is set to position renewable energy as a core pillar in the country's national energy mix, showcasing its economic.

The nation has embarked on carrying out behemoth projects, thereby reflecting its national orientation toward a green economy to reduce reliance on biofuel, an approach that reflects concrete steps toward achieving the environmental and energy objectives of the Qatar National Vision 2030. Qatar had.

The State of Qatar has significantly expanded its investment in solar energy as part of national efforts to diversify energy sources and reduce carbon emissions. These developments reflect the country's commitment to environmental sustainability and align with the goals of Qatar National Vision.

According to the Qatar National Vision 2030, the Qatar General Electricity and Water Corporation (Kahramaa) has unveiled Qatar's National Energy Strategy, targeting an 18% share of renewable energy in the power mix by 2030, up from the current 5%. This ambitious plan aims to add 4 GW of large-scale.

Qatar is aiming to diversify its energy mix and increase the production of renewable resources to nearly 20%. In 2030, Qatar has the goal of producing 4000 megawatts of solar power. The subtropical climate Qatar has is ideal for solar

production due to the naturally occurring high levels of solar. What is Qatar's first large-scale solar project?

Projects like Al Kharsaah Solar Plant are driving the country's clean energy transformation. The Al Kharsaah Solar Plant is Qatar's first large-scale solar project, covering over 1,000 hectares.

How can Qatar diversify its energy portfolio?

**Green Energy Expansion:** Investments in solar power, wind energy, and hydrogen production are key to diversifying Qatar's energy portfolio. **Cleaner LNG Production:** The North Field Expansion Project is being designed with carbon capture and storage (CCS) systems to minimize emissions during LNG production.

How has Qatar improved its solar energy sector?

Since the launch of Al Kharsaah plant in 2022, with an initial capacity of 800 megawatts, Qatar rapidly enhanced its solar energy sector, doubling its capacity within just three years, which is a remarkable achievement in itself. Dr.

What is Qatar doing to reduce energy waste?

Initiatives like the Tarsheed Program encourage citizens and businesses to adopt renewable energy systems, reducing energy waste. Qatar plans to continue expanding its solar capacity, with additional solar parks expected by 2030. The nation is committed to becoming a regional hub for clean energy while maintaining its leadership in LNG exports.
