

Senegal portable solar container battery field

Overview

Senegal has begun commercial operations at a new solar energy facility that combines photovoltaic power with lithium-ion battery storage, the first of its kind in West Africa, as the country of over 18 million people moves to strengthen its electricity grid.

Senegal has begun commercial operations at a new solar energy facility that combines photovoltaic power with lithium-ion battery storage, the first of its kind in West Africa, as the country of over 18 million people moves to strengthen its electricity grid.

The West African nation, where over 60% of the population have access to electricity—one of the highest in the sub region—aims to achieve universal energy access by 2030. Senegal has begun commercial operations at a new solar energy facility that combines photovoltaic power with lithium-ion battery.

Africa REN has commissioned a 16 MW solar plant with 10 MW/20 MWh of battery storage in northern Senegal, billed as the first grid-connected solar-plus-storage facility in West Africa. Independent power producer Africa REN has commissioned a solar-plus-storage project in Senegal. The Walo Storage.

Described as a first for West Africa, a solar PV installation with battery storage project dedicated to frequency regulation has been commissioned in Senegal. The Walo Storage project in Bokhol is already connected to the National Electricity Company of Senegal's (Senelec) grid to help regulate.

North America leads with 40% market share, driven by streamlined permitting processes and tax incentives that reduce total project costs by 15-25%. Europe follows closely with 32% market share, where standardized container designs have cut installation timelines by 60% compared to traditional.

Senegal is adding battery storage to its national power grid as part of efforts to stabilize electricity supply and avoid blackouts. State utility Senelec SA, in partnership with Africa REN, is adding 10 megawatts of battery storage that's capable of holding up to 20 megawatt-hours of electricity.

Senegal and sustainable infrastructure developer Africa REN have commissioned

the Walo Storage facility in Bokhol, marking the first grid-connected solar-plus-battery installation of its kind in West Africa. The €40 million project includes a 16 MW photovoltaic plant paired with a 10 MW/20 MWh.
