Why should I install a solar screen on my Window?

Installed on the outside of the window or in place of a traditional screen, solar screens can help your family reduce cooling costs and increase the privacy of your home without blocking views or reducing airflow. A reduction in window glare. Increased privacy.

How does Photovoltaic Glass work?

Photovoltaic glass operates on the same basic principle as any solar system: it converts sunlight into electricity. It uses solar cells made of materials such as amorphous silicon, crystalline silicon, or advanced thin-film technologies. These cells are encapsulated between layers of glass, making the product durable, safe, and functional.
