

Solar powered water pumps available in Somaliland

Overview

An innovator in Africa's solar power industry has installed and commissioned an electromechanical system north of Hargeisa City in Somaliland to provide renewable energy-powered water pumps. The system consists of three Laasdhure boreholes with 37kW, 55kW and 30kW.

An innovator in Africa's solar power industry has installed and commissioned an electromechanical system north of Hargeisa City in.

Aptech successfully installed and commissioned a system composed of 3 Laasdhure boreholes. The Laasdhure Boreholes have three water pumps installed respectively. The 3 wells supply water to the new pumping station. The project is hybrid with both PV and gensets for power generation. Dilla town.

Adaroosh is a village in southern Somaliland that has suffered from a perpetual water shortage over the years. People have been relying on unclean water fetched from far-flung seasonal rivers as well as from unprotected and unreliable communal water catchments, locally known as Berkads. Today, the.

Near 150 Road, Hargeisa, Somaliland. We incorporate renewable energy into our water supply infrastructure by installing solar-powered pumps, inverters, and storage solutions. These systems reduce fuel dependency and improve reliability.

Officials envision a country where hundreds of thousands of houses catch rainwater on their rooftops, solar-powered boreholes siphon water from deep

beneath the earth and drip irrigation can stretch out precious water supplies. Those interventions were highlighted in a recent government report.

Solarized boreholes installed in Adaroosh village

UNICEF has been prioritizing the procurement and installation of solar-powered water pump systems over ...

Aptech provides solar water pumping solutions in Somaliland

Aptech successfully installed and commissioned a system composed of 3 Laasdhere boreholes. The Laasdhere Boreholes have three water pumps installed ...

50KW modular power converter

- Flexible Configuration**
 - Modular Design (Scalability as Required)
 - Small/Light, Vast Mounted
 - Installed in Parallel for Expansion
- Powerful Function**
 - Support PV/ESS
 - Grid Support, Equipped with SVG Technology
 - On-Grid and Off-Grid Operation
- Reliable Protection**
 - Custom PID Design
 - Sufficient Protection Functions Equipped
