

Special-shaped double-glass components

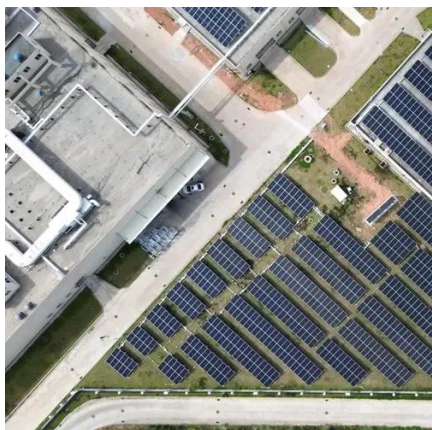

Overview

Insulating glass (IG) consists of two or more panes separated by a space to reduce heat transfer across a part of the building envelope. A window with insulating glass is commonly known as double glazing or a double-paned window, triple glazing or a triple-paned window, or or a quadruple-paned window, depending upon how many panes of glass are used.

Special-shaped double-glass components

[Double Pane Insulated Glass , Thompson Innovative Glass](#)

Double pane insulating glass (also known as insulated glass units or IGUs) consists of two panes of glass separated by a spacer and a sealed air or gas-filled space. This design improves ...

Insulated Glass Units (IGUs) , Custom, Double Pane and Energy ...

Unlike traditional glass, double paned Insulated Glass units can be made of tempered glass or annealed glass, providing exceptional strength, safety, and durability.
