

Stockholm Integrated Project Energy Storage

Overview

Beccs Stockholm is Swedish district energy provider Stockholm Exergi's large-scale BECCS (Bio-Energy Carbon Capture and Storage) facility that is now under construction. Stockholm Exergi will build one of the world's largest facilities for capture and permanent storage .

Beccs Stockholm is Swedish district energy provider Stockholm Exergi's large-scale BECCS (Bio-Energy Carbon Capture and Storage) facility that is now under construction. Stockholm Exergi will build one of the world's largest facilities for capture and permanent storage .

We are creating a world-class, full-scale plant for carbon removal at Stockholm Exergi's existing heat and power biomass plant in the heart of Stockholm! Beccs Stockholm is Swedish district energy provider Stockholm Exergi's large-scale BECCS (Bio-Energy Carbon Capture and Storage) facility that is.

The European Investment Bank (EIB) has granted a loan of €260 million to Stockholm Exergi for the construction of Sweden's first large-scale bioenergy plant with carbon capture and storage (BECCS). Beccs Stockholm, which will begin construction at Värtaverket, is expected to be fully operational in.

Everllence has been chosen by EPC contractor SAIPEM to deliver the core compressor and expander technology for Stockholm Exergi's Bioenergy with Carbon Capture and Storage (BECCS) project at the Värtaverket biomass power plant. The initiative is one of the world's largest bioenergy-based CCS.

In Sweden, municipal energy company Stockholm Exergi AB has announced that it will go ahead and invest around SEK 13 billion (\approx EUR 1.2 billion) to build one of the world's largest facilities for the.

Stockholm Exergi has announced its decision to construct one of the world's largest facilities dedicated to capturing and permanently storing biogenic carbon dioxide, marking a major breakthrough in global efforts to scale up carbon removals. The SEK 13 billion investment aims to support Sweden and.

Stockholm Exergi announced its decision to build one of the world's largest

facilities for capture and permanent storage of biogenic carbon dioxide. The investment decision marks a major milestone in enabling permanent removals and will help Sweden and the EU reach their long-term climate goals. What is Stockholm Exergi's bio-CCS project?

Stockholm Exergi's landmark bio-CCS project Stockholm Exergi has secured government funding of over SEK 20 billion in the Swedish Energy Agency's reverse auction to develop a bio-CCS (bioenergy with carbon capture and storage) facility.

How much does Stockholm Exergi invest?

Stockholm Exergi AB to invest around SEK 13 billion (\approx EUR 1.2 billion) and build one of the world's largest bioenergy with carbon capture and storage (BECCS) facilities.

When does Stockholm Exergi start construction?

With the decision, Stockholm Exergi is starting the construction phase immediately with the goal of having the bioenergy with carbon capture and storage (BECCS) facility operational in 2028. This is a historic moment for Stockholm Exergi and for the climate transition.

Does Stockholm Exergi have a BECCS facility?
