

Stockholm New Energy Building solar Glass Components Research and Development

Stockholm New Energy Building solar Glass Components Research and...

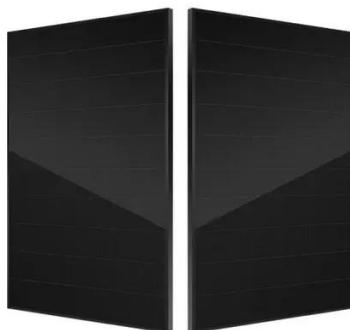

[Energy-Efficient Buildings Standing Out in Stockholm](#)

From the reuse of construction materials to the use of energy-generating glass facades, Stockholm Waterfront Congress Centre is designed to cut CO2 emissions and minimise ...

[Stockholm's Stunning New Icon and 2025 Building ...](#)

The building uses two solar control glass types: COOL-LITE® XTREME 70/33 II and COOL-LITE® XTREME 61/29 II, on the crystal ...

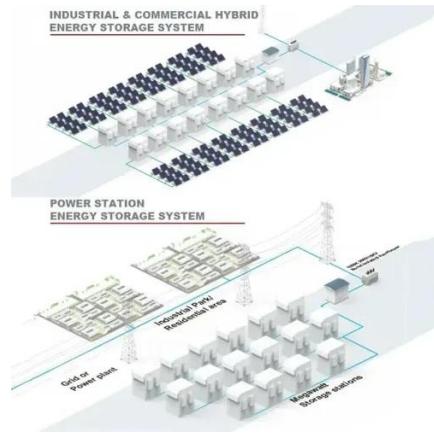

[Stockholm's Stunning New Icon and 2025 Building of the Year](#)

The building uses two solar control glass types: COOL-LITE® XTREME 70/33 II and COOL-LITE® XTREME 61/29 II, on the crystal clear DIAMANT® substrate. This smart ...

FORSKAREN

Forskaren embodies its sustainability ambitions with LEED Platinum, WELL v1 Gold, and Miljöbyggnad Gold certifications, and was honored as Stockholm Building of the Year 2025.

GLASS FOR FAÇADE 2025 - Page 108

More than half of this energy is reflected back through the glass. Forskaren reflects its sustainability ambition with LEED Platinum, WELL v1 Gold, and Miljöbyggnad Gold ...

Solutions for Low-Carbon Building: Stockholm

Though the path to building decarbonization is steep, with years of hard work ahead, Stockholm's successes offer a glimpse into a cleaner, greener ...

Stockholm New Energy Building Photovoltaic Glass Components ...

The integration of photovoltaic technology into building architecture offers numerous benefits: Energy Generation: BIPV systems harness solar energy, reducing the building's reliance on ...

Photovoltaic Glass: The Perfect Fusion of Solar Energy and ...

Discover what photovoltaic glass is, how it works, and how to integrate solar energy and automation into homes and businesses efficiently and sustainably.

Soltech company Essa Glas in glass and glulam ...

The company performs exterior and interior glass solutions, solar facades and roof-mounted solar systems for commercial properties. ...

Solutions for Low-Carbon Building: Stockholm

Though the path to building decarbonization is steep, with years of hard work ahead, Stockholm's successes offer a glimpse into a cleaner, greener future for New York's built environment.

Energy efficiency in glass buildings: A study about the energy

The contradiction between need of energy efficiency and the wish for "glass buildings" led to the subject of this report. This Bachelor's thesis examines how demands on energy efficiency is ...

Research , Department of Building and Environmental Technology

The Division of Energy & Building Design consists of engineers and architects where interdisciplinary research expertise is required to support technically and architecturally well ...

Stockholm New Energy Building Photovoltaic Glass Components Research

The integration of photovoltaic technology into building architecture offers numerous benefits: Energy Generation: BIPV systems harness solar energy, reducing the building's reliance on ...

Soltech company Essa Glas in glass and glulam façade project in Stockholm

The company performs exterior and interior glass solutions, solar facades and roof-mounted solar systems for commercial properties. The business is run from the production ...
