Each farm model is built to the highest food safety.

RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design.

LZY's photovoltaic power plant is designed to maximize ease of operation. It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar.

Solar-driven agriculture merges solar energy production with farming on the same land. This model uses sunlight to generate electricity while growing crops or raising livestock. It creates dual revenue: farmers sell both clean power and agricultural products. For example, solar shipping containers.

Container farms are vertical farming systems that use modified shipping containers for growing food inside without the need for power, water, sunlight or nutrients. Essentially, the container protects a controlled environment (CEA) that is ideal for growing crops, providing a solution for.

Our vertical hydroponic farm solutions maximize growing space while minimizing energy and water usage. Using patented vertical farming technology, our ultra-efficient farms transport easily, can be stacked and are solar capable. Join us in

decentralizing agriculture and reducing carbon emissions.
