Overview

Proudly built in Canada, our modular, scalable, and solar-powered solutions set the standard for quality and reliability in container-based infrastructure. Insula's modular, solar-powered containers support irrigation, cold storage, and equipment charging—built for efficiency and.

Proudly built in Canada, our modular, scalable, and solar-powered solutions set the standard for quality and reliability in container-based infrastructure. Insula's modular, solar-powered containers support irrigation, cold storage, and equipment charging—built for efficiency and.

Our vertical hydroponic farm solutions maximize growing space while minimizing energy and water usage. Using patented vertical farming technology, our ultra-efficient farms transport easily, can be stacked and are solar capable. Join us in decentralizing agriculture and reducing carbon emissions.

RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design.

Container farms are vertical farming systems that use modified shipping containers for growing food inside without the need for power, water, sunlight or nutrients. Essentially, the container protects a controlled environment (CEA) that is ideal for growing crops, providing a solution for.

We recycle and repurpose shipping containers into hydroponic farms to grow fresh produce year-round. Our farms are utilized by farmers, nonprofits, corrections, and agriculture research organizations. Advance Your Mission with AmplifiedAg Farms Each farm model is built to the highest food safety.

Container farming is a vertical farming system that uses modified shipping containers for growing food inside without the need for power, water, sunlight or nutrients.
