The Charge Qube is a revolutionary rapidly deployable Mobile Battery Energy Storage System and Mobile Electric Vehicle Supply Equipment (Type-2 or CCS) designed to meet the diverse and demanding needs of businesses, fleets, and infrastructure projects. Designed for speed and efficiency, the Charge.

Our customers have the ability to charge their EV at three types of UGV Chargers smart charging stations for electric vehicles Base station (AC) 10-43 kW for J1772/Type2 (Mennekes), full car charge takes 2-3 hours Fast (DC) 40-240 kW for CHAdeMO/CCS2, where full charging of the electric vehicle is.

The Mobile Energy Storage Truck, is a cutting-edge solution in the field of energy storage. With a large capacity of 2 MWh, this vehicle offers ample storage to meet the demands of various industries. Equipped with six new energy vehicle charging guns, it allows for fast charging and extended power.

The Sobi 1800W charging station is your reliable means of providing electricity in conditions of power outages or away from electrified premises or infrastructure, for example, when traveling. It will allow you to heat the house, get light in the apartment, work with technology, and be in touch.

We have been working on creating electric vehicle infrastructure in various

markets for 7 years Our goal is to develop the charging network of Ukraine and the world, and that is why the main criteria for evaluating our stations are capacity and reliability. Our charging stations are built using.
