

# Ukrainian portable energy storage power supply

## Overview

---

The project, with an investment of €140 million (\$143 million), will lead to the delivery of Ukraine's first large-scale battery-based energy storage portfolio and the provision of 400MWh of dispatchable power – declared enough to supply short term power for 600,000 homes.

The project, with an investment of €140 million (\$143 million), will lead to the delivery of Ukraine's first large-scale battery-based energy storage portfolio and the provision of 400MWh of dispatchable power – declared enough to supply short term power for 600,000 homes.

In the face of energy shortages, portable batteries have emerged as a crucial solution for providing emergency power. These devices offer a practical way for individuals and businesses to maintain access to electricity during outages. By harnessing renewable energy sources like solar or wind.

Almost all portable power stations that are currently sold on the Ukrainian market are manufactured in China and have inflated prices. Therefore, we created and manufacture our own product in Ukraine - BLACKOUT with a capacity of up to 7.7 kWh and a power of up to 12 kW. You can chose the battery.

In this regard, portable generators (PGs), battery energy storage systems (BESS) and solar panels (SPs) can provide the desired electricity backup, for some of the time at least. Frank Lev takes a closer look. Frank Lev The Ukrainian population, including city dwellers residing in apartment.

The project, with an investment of €140 million (\$143 million), will lead to the delivery of Ukraine's first large-scale battery-based energy storage portfolio and the provision of 400MWh of dispatchable power – declared enough to supply short term power for 600,000 homes. Portable power station.

Energy rationing left Ukrainian households only several hours of power supplies within a day. To improve their living conditions in the winter months, Ukrainians started buying portable power stations: a chargeable battery unit designed to power house lighting, kitchen utensils, small work.

P2U makes use of solar arrays to generate local renewable energy. This energy is

stored in both portable battery packs and the batteries of our EV fleet. Local community governance helps to prioritise how, where and when to use this locally produced energy in times of urgent need. This 'local.
