

# Victoria Power Energy Storage Vehicle

## Overview

---

The 500-megawatt Kiewa Valley BESS – fast-tracked through the Victorian Government’s Development Facilitation Program – will store low-cost renewable energy during the day and release it during peak demand. Once operational, it will supply reliable power to around 172,000 homes each.

The 500-megawatt Kiewa Valley BESS – fast-tracked through the Victorian Government’s Development Facilitation Program – will store low-cost renewable energy during the day and release it during peak demand. Once operational, it will supply reliable power to around 172,000 homes each.

Victoria, Australia, is now home to a groundbreaking energy storage development that is set to redefine the landscape of renewable energy. The installation of a massive \$450 million Tesla Megapack battery energy storage system marks a pivotal moment not only for the state but for the entire global.

Victoria is the home of big batteries and has legislated storage targets of at least 2.6 GW by 2030 and 6.3 GW by 2035 to provide crucial support for more renewable capacity. Storage is a vital part of our electricity grid. In the future, much of our energy will be generated closer to where it is.

The Victorian government has fast tracked the approval of what is to be one of the state’s biggest battery energy storage systems as it seeks to accelerate the development of projects to support its renewable energy ambitions. Australian developer ACenergy’s 350 MW / 700 MWh Little River battery.

The Tramway Road BESS will be built near Eku Energy’s operational 150MW/150MWh Hazelwood BESS in Victoria (pictured). Image: Eku Energy The Victoria government in Australia has approved a 300MW/1,200MWh battery energy storage system (BESS) in Gippsland and a 332MW solar PV power plant with.

Energy Vault (“Energy Vault” or the “Company”), a global leader in sustainable energy storage solutions, has announced a significant agreement with the Victorian government-owned renewable energy company, the State Electricity Commission (SEC). Under this agreement, Energy Vault will supply and.

Australia’s Victoria government has expedited plans for a 400MWh battery energy

storage system (BESS) and a 500MW solar-plus-storage project through its Development Facilitation Program (DFP). The developer, Mint Renewables, is set to construct the 200MW/400MWh Dederang BESS in northeastern.
