

# What is the size of 5v solar panel

## What is the size of 5v solar panel

---

### int

In this case, depending upon what your use case is, you might be better off using int (or long long) for s1 and s2. There are some functions in C/POSIX that could/should use size\_t, but don't ...

### javascript

The OP was asking 'Array.size () vs Array.length'. From the previous discussions, it was make clear, that the 'size' Function is not part of standard JavaScript but implemented ...

### how to modify the size of a column

I created the table Test\_Project2 in Oracle SQL Developer. After that I realized that the column proj\_name is of a small size, so I decided to modify the column using the ...

### [How to determine the size of an object in Java](#)

The approach basically builds on other work where people experimentally identified the size of primitives and typical Java objects and then apply

that knowledge to a ...

## Size function in matlab

As you know, matlab deals mainly with matrices. So, the size function gives you the dimension of a matrix depending on how you use it. For example:  
1. If you say `size(A)`, it ...

## What's the difference between `size_t` and `int` in C++?

In several C++ examples I see a use of the type `size_t` where I would have used a simple `int`. What's the difference, and why `size_t` should be better?

## Difference between `size` and `length` methods?

What is the difference between `.size()` and `.length`? Is `.size()` only for arraylists and `.length` only for arrays?

## What does the C++ standard say about the size of int, long?

If the size of the int is that important one can use int16\_t, int32\_t and int64\_t (need the iostream include for that if I remember correctly). What's nice about this that int64\_t should not have ...

## **What's sizeof(size\_t) on 32-bit vs the various 64-bit data models?**

So, the size of size\_t is not specified, only that it has to be an unsigned integer type. However, an interesting specification can be found in chapter 7.18.3 of the standard: limit of size\_t ...

## **C++**

```
typedef size_t intc; // (instead of unsigned int)
typedef ssize_t uintc; // (instead of int)
Because strlen, string, vector all use size_t, so I usually use size_t. And I only use ssize_t when it may ...
