

Where in Denmark can I buy outdoor power supplies

Overview

What type of plug does Denmark use?

Denmark uses power plugs and sockets that are types E and K. Type K outlets are also compatible with Types C, E, and F. Their standard voltage is 230 V with a frequency of 50 Hz. Most of the outlets will be recessed into the wall with either two or three pins. Type E typically has only two pins, and type K may have a third.

Do I need a power adapter when traveling to Denmark?

If you live in the United States, you will absolutely need a power adapter when traveling to Denmark. The type of plug used for all devices from the U.S. will not be compatible with the outlets used in Denmark. Before you leave for Denmark, we recommend getting a compact and high-quality universal adapter.

Do I need a voltage converter in Denmark?

You'll probably need a voltage converter in Denmark since your device's voltage has to match the local power supply. In the U.S., we use 120V, but Denmark operates on a different voltage, so a converter is required. Before packing your electronics for a trip, always check the voltage label.

Will a US plug work in Denmark?

The type of plug used for all devices from the U.S. will not be compatible with the outlets used in Denmark. Before you leave for Denmark, we recommend getting a compact and high-quality universal adapter. This will support the charging of all your devices when in Denmark, and it will also keep you covered in over 100 other countries.
