

Which countries have wind and solar complementary power stations in Grenada

Overview

This profile provides a snapshot of the energy landscape of Grenada—a small island nation consisting of the island of Grenada and six smaller islands in the southeastern Caribbean Sea—three of which are inhabited: Grenada, Carriacou, and Petite Martinique.

This profile provides a snapshot of the energy landscape of Grenada—a small island nation consisting of the island of Grenada and six smaller islands in the southeastern Caribbean Sea—three of which are inhabited: Grenada, Carriacou, and Petite Martinique.

This profile provides a snapshot of the energy landscape of Grenada—a small island nation consisting of the island of Grenada and six smaller islands in the southeastern Caribbean Sea—three of which are inhabited: Grenada, Carriacou, and Petite Martinique. The 2015 electricity rates in Grenada are.

This is the Energy Report Card (ERC) for 2023 for Grenada. The ERC also includes sectoral data and information on policies and regulations; workforce; training and capacity building; and related areas. The data and information that are available in the ERC were mostly provided by the government.

The nation of Grenada consists of three islands - Grenada with 120 square miles and about 90,000 inhabitants, Carriacou with 13 square miles and a population of about 5,000 and Petite Martinique with about 486 acres. Nicknamed the Isle of Spice, Grenada is a major producer of nutmeg, cinnamon, mace.

Grenlec is committed to diversifying Grenada's energy portfolio while providing safe, reliable, high quality, affordable electric service for everyone. Through a thoughtful, prudent approach, our goal is to stabilise electricity prices in the short-term, and potentially lower prices in the future.

capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the world at a height of 100m. The bar chart shows the distribution of the country's land area in each of these classes compared to the global.

In 2020, Grenada produced 223 GWh of electricity, relying mainly on fossil fuels

(98.12%), with a small contribution from solar energy (1.88%). In 2018, peak demand was 33.2 MW. In 2016, Grenada consumed 185.1 million kWh of electricity. As of 2018, 95.3% of the population had access to.

Which countries have wind and solar complementary power stations in their energy mix?

[Grenada's Renewable Energy Options - GRENLEC](#)

The chart below describes and reviews some of the current renewable energy options we have investigated, along with their advantages and disadvantages for Grenada.

2023 Grenada Energy Report Card

Proposes the establishment of a 100% renewable energy target for both the electricity and transport sectors for 2030. The policy focuses on utility scale geothermal generation, wind and ...
